PRECISION LIQUID FERTILIZER SYSTEMS

designed for planters, drills,
strip till machines, cultivators, & sprayers

- **COMPLETE CUSTOM MANIFOLD SETUPS**
- **COMPLETE CUSTOM TANKS & BRACKETS**
- **APPLICATORS: SS TUBES & REBOUNDERS**
- **DRY FERTILIZER TREATERS**

This is a collection of our most common parts for our GX series of liquid fertilizer application systems. Our systems are customized for our customers needs so if you do not see the particular part you are looking for please contact our Sales Team for assistance.

We look forward to being of service to you and all your fertilizer application needs.

Team Agxcel

GX7

ROW MONITORING SOLUTION

QUANTITIES LIMITED!

RESERVE YOURS TODAY!

Row Monitoring

Gain unparalleled insight into your liquid fertilizer application process by closely monitoring the flow on every individual row. With this level of visibility, you can effectively track and analyze precisely where, when, and how much fertilizer you're distributing, ensuring optimal efficiency and accuracy.

Compatibility

The GX7 ISO is ISOBUS compatible, enabling it to seamlessly connect to and communicate through your "existing cab monitors" virtual terminal

Functionality

The GX7 ISO is designed to seamlessly integrate with any existing liquid fertilizer pump system you may have in place.

Utilizing AgXcel Magnetic Flow Meters

- No mechanical moving parts
- For viscous or dirty chemicals

O	17919	FITTINGS FOR QC PUMP
	32313	FITTINGS FOR THREADED PUMP

Clean, sleek and efficient....tried and tested

- Shipped pre-assembled to YOUR specs.
- Easy Installation and seamless management
- Single Pump Configurations
- Large 4" Gauge for proper pressure management
- Filters, 50 & 80 Mesh Screen
- Custom built weather packed harnesses
- Withstands even the most demanding conditions

Perfectly paired with our Manual rate controller
(See pg. 48 - 49 for kit details)

- Simple & Effective flow control management
- Easy Flow Regulator
- On/Off Switch

- Simple, plug 'n play Installation

SIGHT COLUMNS		
PN#	DESCRIPTION	
STANDARD FLOW	55153	Wilger Standard Flow Column Only
	20985	Wilger Standard Flow Column W/balls, clip, retainer (No Top)
	37637	Wilger Std Flow Complete Column(s) 4 pack w/ End cap, clips & 3/8 barb Tops
	37724	Wilger Std Flow Complete Column(s) - 4 pack w/End cap, clips & 3/8QC Tops
BALL SELECTION FOR 30" ROWS - STD FLOW		
3-6 GPA	18077	Green Plastic* Ball
3-10 GPA	18078	Red Plastic* Ball
10-20 GPA	18079	Maroon Glass Ball
13-70 GPA	18080	Stainless Steel Ball
*These balls may float to the top with heavier fertilizers, such as 10-34-0. Use Maroon glass in this case.		

COMPONENTS	
PN#	DESCRIPTION
25682	Lock U-Clip
25681	Flow Indicator Ball Retainer
52142	1/4" Poly Gauge Elbow for Tee
25685	Orange plastic Ball
25686	Viton O'Rings for between Columns
19992	FKM O'Rings for between Columns
428	GXChassis Swivel Kit (Complete)
54123	GXSwivel Kit w/hardware ONLY
38260	GXChassis (Tomahawk Only)
PLUMBING	
308	3/4" Black Hose (Use #12 Clamps - PN#19646)
19920	1/4" Black Tubing
54121	3/8" Black Tubing
17614	3/8" Black Hose (Use #6 Clamps - PN#17649)

** For more manifold components see pages 24 -25.

Externally, the low flow column can be identified by "Low Flow" imprinted into one side of the column. All the same fittings work with either the low flow or standard flow columns

CALCULATOR
Our easy to use, orifice and metering tube calculator is available FREE now on the App Store.

SIGHT COLUMNS		
PN#	DESCRIPTION	
LOW FLOW	25689	Wilger Low Flow Column Only
	25687	Wilger Low Flow Column W/balls, clip, retainer (No Top)
	37617	Wilger Low Flow Complete Column(s) - 4 pack w/ End cap, clips & 1/4QC Tops
	37723	Wilger Low Flow Complete Column(s) - 4 pack w/End cap, clips & 3/8QC Tops
BALL SELECTION FOR 30" ROWS		
1-3 GPA	18077	Green Plastic* Ball
2-4 GPA	18078	Red Plastic* Ball
3-6 GPA	18079	Maroon Glass Ball
5-10 GPA	18080	Stainless Steel Ball
*These balls may float to the top with heavier fertilizers, such as 10-34-0. Use Maroon glass in this case.		

NEW

O-ring Upgrade: FKM

All Wilger parts are transitioning to being manufactured with FKM O-rings & seals. The fluoroelastomer (FKM) o-ring provides superior chemical resistance and durability over Buna o-rings.

** Premium Viton o-rings, seals and assemblies will continue to be available **

NEW

The 1/4" Push-in tube outlets have received a full redesign for heavier duty sealing and easier release.

Independent teeth & collet

** This redesign also applies to the radial lock caps on check valves **

GX2 SYSTEM COMPONENTS		
PN#		DESCRIPTION
A	SOLD SEPARATELY	*See page 40 for Section valve kit details and ordering part numbers.*
B		*See pg. 18 - 37 for manifold part numbers - kits based upon no# of rows. Call for details.*
Basic GX2 replacement parts If you do not see the particular part you need, please contact our sales team for assistance.		
C	19935	GX2CHASSIS - Metal Chassis only
D	20331	PUMP MOUNTING BRACKET
	20381	GX PUMP HARDWARE KIT for Bracket
E	39500	BYPASS VALVE
F	53960 53959	BYPASS VALVE Bracket (Front/Back) Both are needed to hold relief valve
G	18005	3/4" SHANK
H	15	3/4" HOSE SHANK TEE (inlet)
I	20340	IN LINE TEE FOR BLEEDER VALVE (NOT SHOWN - BACK SIDE)
K	20002	5.3 GPM PUMP QC (STANDARD)

	51238	80 MESH FILTER ONLY
N	32331	3/4" BARB ELBOW 3/4MNPT
O	17919	FITTINGS FOR QC PUMP
	32313	FITTINGS FOR THREADED PUMP
OPTIONAL MOUNTING BRACKET FOR THIS GX STYLE		
P	53969	GX2CHASSIBASEKIT (REQ 8-10" BAR MINIMUM)
Q	55060	GX2CHASSISEXTENDERKIT
R	53970	GX2CHASSIS FOR JD CCS (NO REFUGE TANK PRESENT)
S	55792	GX2 CCS CHASSIS BASE 1770/1790 (BETWEEN SEED BINS)

GX2B SYSTEM COMPONENTS		
PN#		DESCRIPTION
A	SOLD SEPARATELY	See pg.38 - 39 for flow meter options. Call for details*
B		See pg. 44 - 49 for Integration options Call for details.*
Basic GX2B replacement parts If you do not see the particular part you need, please contact our sales team for assistance.		
C	53821	GX2BCHASSIS - Metal Chassis - No longer Avail.
D	38254	1" FLANGE x 3/4" HB ELBOW
E	39456	BYPASS VALVE
F	51334	FLANGE CROSS
G	50016 32361	1" MANIFOLD PLUG w/ 1/4" FPT 1/4" PLUG
H	33132 50016	1" CLAMPS GASKET
I	20340	IN LINE TEE FOR BLEEDER VALVE on back side plumbing (Not Shown)
J	33816	60 PSI Gauge
K	20002	5.3 GPM PUMP QC (STANDARD)
	20162	5.3 GPM PUMP THREADED
THIS GX STYLE ONLY SUPPORTS ONE FILTER OPTION		
L	51169	50 MESH IN LINE FILTER (STD. ON B STYLE)
	17677	50 MESH FILTER ONLY
	51238	80 MESH FILTER ONLY
M	18005	3/4" BARB 3/4MNPT
N	17919	FITTINGS FOR QC PUMP
	32313	FITTINGS FOR THREADED PUMP
O	53822	GX2BCHASSIBASEKIT
OPTIONAL MOUNTING BRACKET FOR THIS GX STYLE		
P	53833	GX2BSTACKERBASEJD
Q	53913	GX2BCCS/1790/DB/ADAPT BKT

The GX2B and the NEW GX2C styles offers a lower profile for those extra busy implements. The NEW GX2C replaces the GX2B and is available in a single or dual pump set up. See page 8 for the GX2C components.

A 50 mesh in line filter was standard on the GX2B style systems. However, the interior filter can be changed out for either an 80 or 30 mesh, depending on customer preference or chemical being applied.

PLUMBING	
308	3/4" Black Hose (Use #12 Clamps - PN#19646) All GX1, GX2 & GX3 Systems are plumbed with 3/4" Hose
19920	1/4" Black Tubing
54121	3/8" Black Tubing
17614	3/8" Black Hose (Use #6 Clamps - PN#17649)

GX2C SYSTEM COMPONENTS

Keep From Extreme Temperature

Protect the injector from freezing temperature or excessive heat.

Rinse Injector After Each Use

Additives allowed to remain in injector can dry out, foul or damage the lower end at the next start-up.

Injector Not in Use for an Extended Period

If the injector has not been stored properly deposits may have dried onto the motor. Before operation, soak entire unit into room temperature water approximately 72°F (22°C) for a 24 hour period.

Kit H WSP: Motor piston kit

Motor piston assembly

Change
as needed

****NOTE:** Parts within kits are not available for individual sale. Only as complete kits **

****System must be flushed out after every use to avoid damaging components****

Kit A: Dosage gasket kit

Dosage gasket

Light Usage:
Change every 6-12 months

Medium Usage:
Change every 6 months

Heavy Usage:
Change every 3-4 months

Kit B: Wear kit

Dosing gasket,
shaft

Change
as needed

Kit D WSP: Check valve kit

Suction tube fitting
assembly (poppet,
O-ring, spring, fitting)

Change
as needed

Kit E: Wear parts maintenance kit

Inner cylinder, shaft and
check valve

Change
as needed

Kit G WSP: Complete lower end kit

Dosing gasket, O-ring,
shaft, gasket, inner cylinder
and check valve, outer
cylinder, ratio adjuster,
O-rings, pin, filter, solution
tube with strainer filter

Change
as needed

All referenced kits come with standard Viton seals.

Every 3 - 6 Months

1. Clean Seal areas #44.
2. Clean & Check #64 Seal, #68 Cylinder, clean and/or replace as necessary.
3. Clean Filters

Every 6 - 12 Months

1. Replace Dosage gasket #44.
2. Clean and/or replace Check Poppet, inside #11 Suction Tube Fitting.

Replace as Necessary

1. #68 Cylinder
2. #64 O-ring/Gasket
3. Motor Piston #9
4. #51 and #44 Shaft Assembly
5. Check Valve Assy and Tubing

NOTE: Maintenance intervals may vary depending on conditions of use and the chemicals being injected.

DEFINITIONS:

LIGHT USAGE: Injector is used once a week

MEDIUM USAGE: Injector is used 3-4 times each week

HEAVY USAGE: Injector is used 24 hours a day, seven days a week

****System must be flushed out after every use to avoid damaging components****

2% RATIO TO SET %	
RATIO	SET%
50 - 57	2.0%
58 - 64	1.8%
65 - 80	1.5%
81 - 95	1.25%
96 - 130	1.0%
131 - 180	.75%
181 - 400	.50%
401 - 650	.20%

STEPS TO CALCULATE YOUR %

1. TAKE YOUR CHEMICAL TOTAL OZ.
2. DIVIDE THAT NUMBER BY TOTAL OZ OF CARRIER
3. MOVE DECIMAL RIGHT 2 SPACES
EX: 6oz/640 = 0.009 = .9%

5% RATIO TO SET %	
RATIO	SET%
20 - 21	5.0%
22 - 23	4.5%
24 - 25	4.0%
26 - 30	3.5%
31 - 34	3.0%
35 - 42	2.5%
43 - 57	2.0%
58 - 75	1.5%
76 - 128	1.0%

The AgXcel GX12HP Revolution is a state-of-the-art high pressure chemical injection solution designed for the precise dose of Nano application solutions. Whether you are looking to inject low volume insecticides, fungicides or inoculants the GX12HP can effectively handle rates as low as 2 ounces per acre. Designed with the ability to accurately dispense liquid at high pressure. Injection is exact and precise with the ability to manage and change rates on the fly.

- GX12hp Low Flow - For use with injection rates from 2oz/min to 24oz/min
- GX12hp High Flow - For use with injection rates from 20oz/min to 128oz/min
- High performance positive displacement pump equates to an accurate and precise dosage on every acre.
- Utilizing AgXcel's state of the art proprietary electronic motor driver.

Great for use with insecticides, fungicides, nutrient managers and micro-nutrients. With the ability to seamlessly integrate fully into major OEM controllers like Field-IQ, Agleader, Raven, Micro-Trak, Pro700/ AccuControl and John Deere, management of the GX12HP becomes effortless. With the use of AgXcel integration kits the setup is simple and straight forward.

	307	26315 = BODY 54260 = 3/8" PTC CAP 19884 = 3/8" PTC INLET	10# CHECK VALVE WITH 3/8" PTC INLET/OUTLET 

The preferred placement of the Agxcel check valve is as close to the row unit as possible, without sacrificing the security of the check valve. Approximately 30" from the bottom of the furrow (on every row, equal lengths) where liquid is being placed is ideal.

Follow these steps for successful placement:

1. Find a secure location, on top of the row unit where debris (like in no-till conditions) will not catch the check valve or tubing and rip it out of place.
2. Ensure that the install location allows for a tie strap to securely mount the check valve in place.
3. The check valve works best when approximately 30" from where liquid is being placed.
4. Ensure that the mounting location allows for ease of access to the orifice, in case the orifice size needs to be changed.

CHECK VALVE EXAMPLES

O-ring Upgrade: FKM

All Wilger parts are transitioning to being manufactured with FKM O-rings & seals. The fluoroelastomer (FKM) o-ring provides superior chemical resistance and durability over Buna o-rings. ** Premium Viton o-rings, seals and assemblies will continue to be available**

CAP ASSEMBLY

Snap in Strainer & Seal adapter (PN# 25953)

O-ring seal - FKM (PN# 25951)
O-ring seal - Viton (PN# 25952)

3/8" Hose barb cap (SHOWN)

FLEXIBLE CONFIGURATIONS

Floating ball manifolds are extremely flexible and can be mounted in many different configurations on various types of liquid implements. The following illustrations will provide some general concepts on how to configure your implement.

Plumbing Overview

This is typically ¼" OD tubing or 3/8" hose. Maximum recommended length is 20 feet and lengths do not need to be equal.

**12 Row Dual Product****Product 1 - Split 4 - 4 - 4****Product 2 - Split 4 - 4 - 4 (add-on 12 Row)**

Shown here is a 12 row with three - 4 row sections controlled by a 3 section valve kit. Note each 12R T-bracket can hold 3 separate 4 row manifolds. Second product is similar and mounted lower with an extended swivel bracket kit. Each product kit and section valve kit is sold separately.

**12 Row Split 3 - 3 - 3 - 3**

Shown here is a 12 row with four - 3 row sections controlled by a 3 section valve kit. Note each 6R T-bracket can hold two separate 3 row manifolds. A 4 section 24 row could be similar with four 6 row manifolds on two large 12R T-brackets.

**16 Row Split 6 - 4 - 6**

This configuration works well on a 16 row front fold planter. Each flow indicator manifold is shown fed by a cross in a single section installation. Each manifold could be fed by a section valve if desired.

IF FEEDING YOUR GX6 SYSTEM FROM A FLOATING BALL MANIFOLD

The inlet to each dual body will be dependant on the outlet on the visual sight columns. For instance, if the outlet is 1/4" QC then you will feed each GX6 dual body with a 1/4" QC inlet that will thread into the GX6 dual check body. Below are our default adapters available for each feed type.

NOTE: Add-on kits **DO NOT** include all the components of a full manifold kit. These components will need to be added to complete set up.

**DO NOT OVER TIGHTEN!**

When assembling the elbow and/or tee into the adapter casing of check valve body, be careful. It is easy to over tighten, cracking the casing. If purchased as a complete kit a couple of extra adapter bodies are provided.

**CALCULATOR**

Our easy to use, orifice and metering tube calculator is available FREE now on the App Store.

** For variations on the GX Dual Metering Manifold when feeding the rows from visual sight gauge see pg.27 **

INSTALLATION TO STAINLESS STEEL TUBES

NOTE: For "U" there are 3 options available depending on where it is being mounted.

For thin wall stainless steel tubes, you can simply push the 1/4" black tubing all the way through the stainless steel tube so fertilizer will run directly from manifold onto the ground.

INSTALLATION TO REBOUNDER SEED COVER

1. Mount the rebounder seed cover according to the instructions sent with it.
2. Route the tube included in the rebounder optional fittings kit. Make sure all lengths are equal. The rebounder optional kits come with 30" of 1/4" poly tubing.
3. Attach the 1/4" poly tube to the 1/4" QC "Y" divider fitting.
4. Zip all tubing to the planter and row unit in as many locations as possible.

NEW

O-ring Upgrade: FKM

All Wilger parts are transitioning to being manufactured with FKM O-rings & seals. The fluoroelastomer (FKM) o-ring provides superior chemical resistance and durability over Buna o-rings.

** Premium Viton o-rings, seals and assemblies will continue to be available **

NEW

The 1/4" Push-in tube outlets have received a full redesign for heavier duty sealing and easier release.

Independent teeth & collet

** This redesign also applies to the radial lock caps on check valves **

ORS WILGER DRILL MANIFOLD

For applications that do not require visual monitoring, our NEW ORS manifold is a cost effective way to split up and meter flow directly from your feeds to your outlets.

Compatible with all ORS fittings and components.

Easy push pin assembly unlike older PVC style manifolds.

Mounting Bracket is versatile to either mount vertically or horizontally across a tool bar.

NEW

Independent teeth & collet

The 1/4" Push-in tube outlets have received a full redesign for heavier duty sealing and easier release.

Wider face for easier removal

Formed FKM seal for easier tube install

** This redesign also applies to the radial lock caps on check valves **

NOTE:

blue cap = 4lb check valve
black cap = 10lb check valve

GX30 VALVE ASSEMBLY LAYOUT

There are a variety of configurations for the GX30i valves. However, the most common will be 3/8" QC with 3/8" tubing or 3/8" barb with 3/8" hose. When the GX30i is used in conjunction with a floating ball manifold the line out of the wilger tops will be split prior to reaching the dual valves and properly re-integrated after the valves. (see illustration)

GX30 VALVE ASSEMBLY**GX30 VALVE OLDER BODY ASSEMBLY**

PN#	DESCRIPTION	B COMPLETE GX30 BASE VALVE ASSEMBLY PN# 54508
54333	GX30PROSTOP - EVALVE (VALVE ONLY)	
54379	PRO STOP BODY 1/4" MNPT/BAYONET	
26453	COMBO CLIP MALE ADAPTER 1/4" THREAD	

NOTE: The top of the valve can spin to any desired direction simply by pulling out the locking pin slightly, lift the head of the valve, and face desired direction.

This is the base assembly of every GX30iVRT Valve body per row. The only changes will be the inlet/outlet components depending on how the rows are plumbed or using metering tubes instead of orifices

NOTE: For GX30 system details see page 62 - 63.

GX30 VALVE NEWER KZ BODY ASSEMBLY

PN#	DESCRIPTION	B COMPLETE GX30 BASE VALVE ASSEMBLY PN# 56646

AGXCEL MAGNETIC/TURBINE FLOW METERS

Serial number, flow meter range and calibration number are all listed on the side label.

The new style Magnetic Flow Meters have a black body casing with an integrated AMP Super seal connector.

When using a magnetic flow meter one of the harnesses below must be used for the OEM controller to be able to calculate the flow. See charts below.

NEW

****NOTE:** New updates to controllers can now input 5 digits. The "New" chart reflects this change. However, If you have an older system already using a DB8 cable, use the second chart below for your cal#.

FLOW RANGE (GPM) DIVIDE BY 8 REQUIRED	PULSES PER GALLON	JOHN DEERE GS2/GS3		AG LEADER		TRIMBLE		MICROTRAK	
		DB8 CABLE	CAL#	DB8 CABLE	CAL#	DB8 CABLE	CAL#	DB8 CABLE	CAL#
0.08 - 1.6	22710	YES	2839	NO	22710	NO	22710	NO	45420
0.13 - 2.6	22710	YES	2839	NO	22710	NO	22710	NO	45420
0.3 - 5	11355	YES	1419	NO	11355	NO	11355	NO	22710
0.6 - 13	4542	NO	4542	NO	4542	NO	4542	NO	9084
1.3 - 26	2271	NO	2271	NO	2271	NO	2271	NO	4542
2.6 - 53	1135	NO	1135	NO	1135	NO	1135	NO	2270

A controller that requires a DB8 harness is due to the fact that when inputting the flow meter cal number, some controllers can only input 4 digits. A DB8 harness will take the pulses per gallon and divide it by 8. Giving you a 4 digit cal number.

NOTE: To get the cal numbers for Micro-Trak controllers the formula is - Divide by 8, multiply by 2.

FLOW RANGE (GPM) DIVIDE BY 8 REQUIRED	PULSES PER GALLON	JOHN DEERE GS2/GS3		AG LEADER		TRIMBLE		MICROTRAK	
		DB8 CABLE	CAL#	DB8 CABLE	CAL#	DB8 CABLE	CAL#	DB8 CABLE	CAL#

GX SECTION KITS		VALVES ONLY
KIT PN#	DESCRIPTION	PN#
54833	1 SECTION VALVE SWATH KIT - INCLUDES MOUNTING BRACKET, POLY FITTINGS, HARDWARE, STAINLESS HOSE CLAMPS AND 50' OF 3/4 HOSE	54002
54834	2 SECTION VALVE SWATH KIT - INCLUDES MOUNTING BRACKET, POLY FITTINGS, HARDWARE, STAINLESS HOSE CLAMPS AND 50' OF 3/4 HOSE	40406
54835	3 SECTION VALVE SWATH KIT - INCLUDES MOUNTING BRACKET, POLY FITTINGS, HARDWARE, STAINLESS HOSE CLAMPS AND 100' OF 3/4 HOSE	40412
54836	4 SECTION VALVE SWATH KIT - INCLUDES MOUNTING BRACKET, POLY FITTINGS, HARDWARE, STAINLESS HOSE CLAMPS AND 150' OF 3/4 HOSE	40418
54837	5 SECTION VALVE SWATH KIT - INCLUDES MOUNTING BRACKET, POLY FITTINGS, HARDWARE, STAINLESS HOSE CLAMPS AND 150' OF 3/4 HOSE	40421
54838	6 SECTION VALVE SWATH KIT - INCLUDES MOUNTING BRACKET, POLY FITTINGS, HARDWARE, STAINLESS HOSE CLAMPS AND 200' OF 3/4 HOSE	40427
** Depending on section mounting location, extensions not included in kits above may be necessary. **		

SECTION EXTENSIONS	
56171	GXH_EXT20
56172	GXH_EXT30
56173	GXH_EXT40
56174	GXH_EXT50
Extensions are not included in the base kit. Use PN# 20031 for a custom sized extension.	

SECTION MOUNTING BRACKET ONLY - For up to 6 valves.
PN# 53463

Example above shows section brackets mounted back to back.

** OPTIONAL PRESSURE TRANSDUCER KIT (PN#53491) Available for purchase in place of the gauge **

PN#17693 GX5 Bracket assembly for DB models without compressor.

Optional ways to mount the sections.

PN#53957 GX5 Bracket assembly for JD 1770 NT Front Fold planter for 24 row planters. This bracket WILL NOT fit DB models.

SPECIFICATIONS:

- MAXIMUM PRESSURE RATING: 215 PSI (15 BAR)
- FLOW RATE: 11.7 GPM (44 l/min) @ 5 PSI (.34 BAR) PRESSURE DROP
- FLOW RATE: 16.5 GPM (63 l/min) @ 10 PSI (.69 BAR) PRESSURE DROP
- CURRENT DRAW: LESS THAN 0.5 AMP AT 12 VDC
- RESPONSE TIME: 0.6 SECONDS
- WETTED MATERIALS: POLYPROPYLENE, STAINLESS STEEL, VITON, AND TEFLON

FEATURES INCLUDE:

- REGULATED BYPASS FEATURE SIGNIFICANTLY IMPROVES PRESSURE STABILITY WHEN BOOM SECTIONS ARE SWITCHED ON OR OFF
- GRADUATED BYPASS PORT IS ADJUSTED TO MATCH BOOM SECTION FLOW WHICH REDUCES SYSTEM PRESSURE INCREASES AND DECREASED
- REGULATED BYPASS ALLOWS THE REGULATING VALVE TO MAINTAIN A MORE STABLE POSITION
- BYPASS PORT IS COMPATIBLE WITH EXISTING TEEJET QUICK CONNECT FITTINGS
- BUILT IN MINI-DIN CONNECTOR
- "EC" STYLE IS COMPATIBLE WITH AUTOMATIC BOOM SECTION CONTROLS
- MOTOR ASSEMBLY COMPLIES WITH IP67 RATING
- QUICK RELEASE MOTOR ASSEMBLY ALLOWS FOR FIELD INSPECTION AND MANUAL VALVE ACTUATION
- ALL METAL GEARS FOR STRENGTH AND DURABILITY
- RESETTABLE INTERNAL FUSE (DISCONNECT POWER FOR 20 SECONDS TO RESET)
- "EC" STYLE MOTOR USES A SINGLE POLE, SINGLE THROW SWITCH
- STAINLESS STEEL STEM AND BALL PROVIDE EXCELLENT DURABILITY
- VALVE IS MOUNTED WITH 5/16" (8MM) BOLTS

AgXcel is excited to announce its latest innovative product with the release of its new GX9i PWM EPD Driver. After years of design, development and customer feedback AgXcel has developed a state of the art driver that can handle even the harshest demands and environments in controlling its line of precision liquid application solutions. The on-board circuit technology can intelligently manage system resources which enables high demanding performance when controlling 12v electric pump(s). The durability of this EMD is far superior than any EMD on the market today.

LED Status - Multiple LED's that enable enhanced monitoring and troubleshooting

GREEN - Power indicator that can alert when 12v is present or when voltage has dropped below superior performance levels

BLUE - Complete monitoring of EMD PWM signal informing user of proper signal strength and appropriate duty cycle

YELLOW - Temperature control module that protects the unit from current spikes or high current heat

RED - Management and monitoring of motor current. This enhancement allows for proper circuit current for electric motors

ORANGE - Intelligently monitors the appropriate voltage to electric pumps and closely monitors pump(s) performance

MANUAL RATE CONTROL KIT

SINGLE PUMP PN# 563

DUAL PUMP PN# 564

Kit comes with standard 15 ft and 20ft extensions per pump with a lift switch kit (with two 15 ft extensions and magnet mount).

In case of a dual pump configuration, a "Y" harness is included to control both pumps.

DUAL PUMP MANX "Y"
PN#17945

MANX CONTROL KIT SINGLE PN#563		
PN#	ITEM	QTY
17934	MANX CONTROLLER	1
18113	15 FT EXTENSION	1
53660	20 FT EXTENSION	1
17944	15FT BATTERY CABLE 30AMP FUSE	1
ONLY 1 KIT BELOW WILL BE INCLUDED:		
53824*	RUN/HOLD KIT*	1
54066*	MERCURY SWITCH KIT*	1

*Kits will come with either a mercury or implement switch kit.

MANX CONTROL KIT DUAL PN#564		
PN#	ITEM	QTY
17934	MANX CONTROLLER	1
18113	15 FT EXTENSION	2
53660	20 FT EXTENSION	2
17944	15FT BATTERY CABLE 30AMP FUSE	1
17945	"Y" PUMP CABLE	1
ONLY 1 KIT BELOW WILL BE INCLUDED*		
53824*	RUN/HOLD KIT*	1
54066*	MERCURY SWITCH KIT*	1

FEATURES:

- Rheostat manual speed control for 12-volt pumps
- 6" wiring for power input and output for motor standard
- Sealed heavy-duty electrical connectors
- Reverse polarity protection
- On/Off control switch with power indicator lamp
- Smoother adjustment of pump flow/pressure, which results in reduced sensitivity at the top of the adjustment scale
- Optional stainless steel ammonia gauge can be mounted either outside of the cab or onto the control box with the provided bracket (PN# 53769)
- Run/Hold circuit on 35 amp units
- Control mounted hardware included
- All AgXcel Manual Rate Controllers are backed by a 1-year warranty

NOTE: In a dual pump Manx kit the 'Y' harness will be in the first position before any extensions. This allows for even distribution of power to each pump.

AGXCEL REMOTE MOUNT PRESSURE GAUGE KIT

- 60 PSI - ELECTRIC PUMP(S)PN# 53769
- 160 PSI - HYDRAULIC PUMPPN# 53770

The remote pressure gauge kit includes a gauge with bracket and magnet for easily mounting in any visible location on your implement. The bracket will work to mount to the top or side of a metal frame. Assemble as shown for the mounting that works best in your application.

Also included in each kit are the plumbing fittings to tap into your system. Assemble the 3/4" tee, 3/4" x 1/4" reducer bushing and 1/4" quick connect adapter as shown to the right. Install this assembly in 3/4" hose prior to your manifold and orifices.

Finally, run the 1/4" black tubing from the tee assembly to the gauge mount location.

GAUGE KIT INSTALLATION INSTRUCTIONS:

1. Install in line tee with 1/4" quick connect between final filter and before manifold.
2. Use 1/4" tubing to plumb the gauge and use the magnetic mount to place gauge where desired.
3. For automated systems, ensure that the gauge kit tee is installed at least 24" after the flow meter but before the manifold.

KIT COMPONENTS

	33812	4" AMMONIA 160 PSI GAUGE

GX MERCURY SWITCH KIT**PN# 54066****PN# 54112 (2 PIN - JOHN DEERE)****KIT INCLUDES:**

- 2- 15FT Extension(s) (John Deere or 3pin connector)
- 1- Mercury Switch (PN# 54024 - Switch only)
- 1- Magnet Mount (PN# 17960)

MERCURY SWITCH KIT:

1. Run/Hold optional connections (If not using be sure to use provided loop to close circuit)
 - For use with a N.O. (normally open) whisker switch, remove the dummy plug and connect to your run/hold switch wires. A smaller gauge wire (18 AWG minimum) may be used for this low current circuit.
 - For use with a hall-effect sensor, remove the dummy plug and attach the plug from your sensor.

Illustration shown has a 3pin connector.

HOW TO ADJUST:

If your controller is turning off product application before or after you want, tilt the switch. If it turns off after you want when lifting the implement, tip more to the HOLD position. If product application should begin sooner when you lower the implement, tip more to the RUN position.

HOW TO TEST:

To test the run/hold mercury switch you will need a volt meter. Set the meter to test continuity (or ohms). With the wires down, you should have continuity between the two pins in the connector. With the wires up, the switch should be open (no continuity).

**MOUNT THE SWITCH ON:**

- 3 point arm if in use
- Planter wheel frame that changes angle
- Drill opener frame if openers are pivoted to raise out of ground.

GX IMPLEMENT SWITCH KIT

PN# 53824
PN# 53982 (2 PIN - JOHN DEERE)

- KIT INCLUDES:**
- 1- 15FT Extension (John Deere or 3pin connector)
 - 1- Implement Switch with 15FT Lead (PN# 17921)
 - 1- Magnet Mount (PN# 17960)

IMPLEMENT SWITCH KIT :

- Run/Hold optional connections (If not using be sure to use provided loop to close circuit)
 - For use with a N.O. (normally open) whisker switch, remove the dummy plug and connect to your run/hold switch wires. A smaller gauge wire (18 AWG minimum) may be used for this low current circuit.
 - For use with a hall-effect sensor, remove the dummy plug and attach the plug from your sensor.

Illustration shown has a 3pin connector.

When red lead is connected to pole 1 and black lead is connected to pole 2 pumps will run when whisker is straight

HOW IT WORKS:

Place the whisker switch on a 3 point arm or wheel frame that changes angle as the implement is raised and lowered. When the whisker arm is bent up (against the tool bar), the switch is open placing the controller in HOLD, not applying fertilizer.

When the whisker arm is straight (not touching the toolbar), the switch will be closed. The controller will be in RUN, applying fertilizer.

* The Whisker switch will work with many other controllers. However, the polarity might be reversed from the positions described above.

When red lead is connected to pole 1 and black lead is connected to pole 3 pumps will run when whisker is bent

AGXCEL PRESSURE TRANSDUCER KIT**P/N# 53491**

The AgXcel Fertilizer Application System (FAS) can be configured with an optional pressure transducer feature. The AgXcel FAS system harnesses are designed to allow system pressure to be captured from various location of the FAS system in an effort to monitor pressure. Keep in mind that pressure in an Automatically Managed Rate controlled system is irrelevant as an automatic rate managed system will use calculations to control the rate of the liquid.

However, pressure monitoring is an important tool in system setup and system troubleshooting and can assist in ensuring that the FAS solution is operating properly and this may be attained with a standard analog gauge or a pressure transducer. With the optional pressure transducer the digital readout of the pressure can be displayed in a variety of different OEM controllers.

All OEM's require a different setting for each monitor so please check the corresponding OEM's user's manual for calibration settings.

**PRESSURE TRANSDUCER**

The sensor for the rate controller is a 3-wire type sensor. The Sensor has a 1/4" MPT fitting.

Your display will show the system pressure on the in cab screen. The pressure reading is only for informational purposes and is not used in the flow control process. Flow control uses the flow meter feedback only.

The pressure sensor is very helpful to optimize system performance and troubleshoot any issues.

The pressure transducer is factory calibrated and will display a very accurate pressure reading on your display. No manual gauge is required. However, a remote gauge will be helpful for quick reference when standing near the system and not in cab to see controller display.

When attaching connector to pressure sensor, make sure pins are aligned so they do not bend damaging unit.

At AgXcel we believe in the importance of Responsible Nutrient Management which requires the placement of vital nutrients to the soil at the appropriate location and at the appropriate rate. Limiting technology solutions should not be a barrier to appropriate nutrient replacement.

The AgXcel GX30i is an intelligent decision making microprocessor that manages and controls system pressure in a Variable Rate application environment. This patent pending solution was designed and developed by AgXcel to allow for the application of liquid

fertilizer in an expansive range. Its dual valve management configuration is controlled by a central microprocessor intelligent module to manage system pressure within a specified range. Today's liquid system application rates are limited by the size of each orifice on each row in which higher rates dramatically increase system pressure and lower rates significantly drop system pressure. Many prescription based applications require application rates that span anywhere from 20GPA-40GPA at any given moment. A single size orifice cannot sustain this broad range of application which in turn minimizes the application range, therefore requiring the user to settle for a lesser range of application.

The AgXcel GX30iVRT addresses this issue with the ability to broaden this range by implementing a 3 stage orifice range system. Exhaustive testing at Agxcel has established the critical benefits of a 3 option orifice system.

VRT - (Swath) MODULE KIT

GX30iVRT - up to 32 ROWS - 1 product = KIT PN#54894

GX30iVRT - up to 16 ROWS - 2 product = KIT PN#54338

INCLUDES:

- PRESSURE TRANSDUCER(S)
- CONSOLE
- CONSOLE HARNESS
- CONSOLE SUCTION MOUNT
- MODULE/HUB CONTROL CENTER
- MODULE/CONSOLE HARNESS(BLK)
- SECTION HARNESS(BLUE)
- ROW HARNESS(GRY)

GX30 Cab Display

The AgXcel GX30iVRT intelligent module has an array of intelligence built into the system and designed to manage various pressure points seamlessly. With its ability to control each valve independently swath control is improved by allowing instant flow when the system returns to the flow position. With the ability to manage each row independently and up to 12 sections the GX30iVRT has been developed for expandability for future swath features and row management.

AGXCEL LIQUID APPLICATION

**** IMPORTANT:** GX30 System battery cable must be connected directly to the battery. Any alteration will void warranty**

The GX30iLite Module is an intelligent pressure monitoring system. Set your high and low pressure thresholds by simply adjusting the two screws as illustrated below. This should be while testing the system with water so as not to waste fertilizer. Set "HIGH" will adjust how high your pressure can go before the next set of valves will open. Setting the "LOW" threshold will adjust how low your pressure can go before it switches back to the first valve.

The GX30i VRT Module can be mounted on the tool-bar of the implement using the mounting holes provided on the module itself. Another method would be to use a small amount of Velcro attached to the back of the module.

All underlying circuitry has been sealed to protect it from debris and weather.

VRT - (NON-Swath) MODULE KIT

NOTE: For manifold details see page 34 - 35.

- A 3 system orifice setup with our Dual Body micro valve setup allows for a much broader range of application both at higher rates and at lower rates
- 2 orifice sizes are selected, one for the lower and one for the upper range
- The 3rd orifice is created by allowing both micro valves to open which combines the lower and upper range into a dual application ratio, allowing for a much broader range
- AgXcel also uses our GX6 micro tubing technology to size the application range with 11 different sizes, for solutions that are viscous or have a high particle content.
- The micro valve controls the flow on each row and creates an instant "shut off" point therefore preventing system pressure loss when the liquid system goes into hold mode.
- Systems today use check valves to prevent system "drain out" when the system goes into hold. System pressure will drop down to the check valve pressure setting. So if you have 8lb check valves, system pressure will drop down to approximately 8 psi if not lower.
- With the micro valves system, pressure is maintained when the valve is shut.
- This pressure maintaining feature results in a quicker application start when the system goes back into start mode. The liquid system does not have to build pressure back to its delivering rate which in turn causes start points not to have fertilizer placement until enough pressure is in the system to open up the check valves.
- Lower GPA rates are also achieved at lower PSI ratings. Since there is no longer a check valve that has to open after system pressure is built, with the micro valves they are either flowing or not flowing. This means, even if system pressure reduces down to 2PSI, liquid will still be flowing at the appropriate rate since no pressure is required to open a rated check valve.
- The dual micro valves now serve as the liquid systems "sectional valves" therefore there no longer is the need to run exhaustive amounts of 3/4" feed hose throughout the implement.
- Implementing the dual micro valves on each row allows for a more responsive application when the system goes from hold position to run.

SEE IT IN ACTION!

VISIO MULTIFLOW is a version of VISIO display appositely designed to be connected to ORION MULTIFLOW, the multichannel flowmeter. Thanks to the specific software and by means of an A-net line, VISIO MULTIFLOW is able to display the data of 4 flowmeters for a total of 16 channels

- Possibility to connect up to 4 ORION MULTIFLOW flowmeters and able to read the data of 16 channels at the same time
- Resistant to weather conditions
- USB drive for data transfer and software update
- Visual and sound alarms
- Multi-language, self-adaptive software based on the number of flowmeters connected
- Possibility to set different units of measurement
- Backlit graphic display

AgXcel's PWM

Utilizing AgXcel's proprietary PWM Hyd Valve for unmatched Hydraulic management and system performance *see pg. 75 for parts*

Large valves in AISI 316 for best hydraulic efficiency and better resistance to chemical agents.

Bolts and nuts for affixing the diaphragm in AISI 316.

Long-life BlueFlex® diaphragms for resistance to spraying chemicals and aggressive liquid fertilizers.

Seals in Viton on our LFP Pumps.

BlueFlex Diaphragm

GX5 LFP 80

The GX5 LFP80 is a great pump to use with vApplyHD. Minimal to Zero pulsation for steady, consistent flow. Low maintenance enhanced with Blueflex Technology.

GX5

Our GX5 low pressure diaphragm hydraulic pump systems are simultaneously exquisitely sophisticated in terms of precision application of liquid fertilizer, perfectly in line with the need to protect the environment of today and tomorrow.

- Low Maintenance
- Long-life Blue Flex™ diaphragms for resistance to spraying chemicals and aggressive liquid fertilizers
- Minimal Hydraulic Oil usage
- High Pressure capabilities
- Stainless steel nuts and bolts
- All GX5 LFP System parts in contact with liquids are polypropylene and stainless steel 316 for higher flow and better corrosion resistance
- Minimal to Zero pulsation allowing vApplyHD modules to maintain steady and consistent flow
- The 3+ cylinder design will allow the system to prime faster with less vibration during use.
- Range of .5 - 20 GPM flow rate (*Higher volume systems available*)

1

Our GX5 Hydraulic systems use low pressure diaphragm pumps that can apply a wide variety of chemicals with different viscosities, from .5 GPM to 55 GPM.

2

The GX5 comes in a variety of diaphragm designs from 3 to 6 diaphragm systems rated at 290 PSI. The pumps are rugged enough to handle strong chemical agents with ease.

3

Designed for a wide range of professional agricultural application environments:

- Planting
- Drilling
- Side Dressing
- Strip-Tilling
- Pre-Bedding for Potatoes
- Custom Applications

Nº2 High Quality needle bearings under the connecting rods to reduce friction

Pump head in Nylon for aggressive chemicals.

For all those especially demanding jobs go with the BLUEFLEX diaphragms that are a step ahead.

Go beyond your expectations!

LFP120V	55635	3 DIAPHRAGMS - VITON FOR LOW PH 1 - 30 GPM - LIQUID FERTILIZER PESTICIDES
LFP160	53588	4 DIAPHRAGMS - BLUE FLEX 5 - 35 GPM - LIQUID FERTILIZER PESTICIDES
D250	53597	6 DIAPHRAGMS - BLUE FLEX 5 - 55 GPM - STANDARD

Complete LFP160
shown above

Optional - Integration into GS2/GS3, JD2K, Trimble, AgLeader, Raven, MicroTrak is approximately \$1800.00 - \$2600.00 on top of the prices listed - Includes, Harnesses, Flow Meter, and brackets. (Additional cost for swath control setups)

** Manifold kits are also available and a variety of GX5 mounting brackets sold at an extra charge **

Due to possible manufacturers price changes, prices are subject to change without notice.

Complete GX5 hydraulic system with pump, pwm valve, hydraulic motor, hoses, clamps, replacement oil and diaphragm kit all completely assembled, ready to go.

GX⁵ FOR vAPPLY HD

NO PLUMBING - PUMP, MOTOR, PWM AND PUMP FLANGE KIT - ONLY

Complete LFP120
shown above

ADDED TO KITS ABOVE	53687	GXvAPPLY RPM ADD-ON KIT - MUST BE SOLD IN CONJUNCTION WITH A GX5 SYSTEM	

NEW

GX5

HEAVY DUTY & LONGER LIFE DIAPHRAGM

SPECIAL SHAPE

The special shape and thickness of the diaphragms has been carefully optimized to reduce mechanical stresses during the working cycle of the pump even under the most difficult working conditions.

BLUEFLEX SYSTEM

The combination of the new BlueFlex diaphragms when used with the new patented diaphragm plate is known as the "BlueFlex System". This translates into heavy duty and long diaphragm life.

PATENTED DIAPHRAGM PLATE FOR BLUEFLEX DIAPHRAGMS

The new patented diaphragm retaining plate has a shape that minimizes the possibility that the diaphragm can get caught or nicked by the diaphragm plate.

agXcel

STANDARD FEATURE ON ALL GX5 HYDRAULIC SYSTEMS

Give us a call to find out which GX5 with BlueFlex is best suited for your needs!

TIP: If unsure of pump size, look for a metal label on either the oil reservoir or on/or near the base of pump.

**WARNING!**

Do Not use the GX5 diaphragm pump for applying two-step curing compounds, asphalt or asphalt sealer, or other products that can harden inside the pump.

Do Not use the GX5 diaphragm pump to pump flammable liquids, including gasoline or diesel fuel.

Pumping bleach with the GX5 diaphragm pump will void the manufacturer warranty.

Do Not allow this pump to freeze with water inside the pump.

Failure to follow these warnings will result in personal injury, pump damage and void the warranty.

In order to prevent debris and chemical deposits from clogging or logging into your hydraulic system, Agxcel recommends a minimum of 30 mesh filter in line between tank and system inlet. Even the smallest debris can block diaphragms from closing properly affecting rates and pump performance.

Universal mounting bracket

PN#54898 Universal mounting bracket

PN#54397 GX5 Bracket for JD1720 CCS (mounted to circular plate on lift assist frame)

OPTIONAL MOUNTING GX5 MOUNTING BRACKETS

PN#54586 CASE IH/JD bracket to mount the GX5 on the draw bar (Bracket can fit draw bars 8" to 10" wide)

PN#53678 GX5 bracket for JD planter front fold for 12 & 16 row planters - will NOT fit DB models.

PN#53968 GX5 Bracket for on the rear lift assist wheels on JD1790 planter.

PN#53957 GX5 Bracket assembly for JD 1770 NT front fold 24 row planter - will NOT fit DB models.

GX5

Older style required proper use of the tank to pump kit that was included in every system sold, providing extra filtration between tank and complete system inlet.

Older style also provided a 50 mesh filter plumbed before flow meter for secondary filtration.

PN#53968 GX5 Bracket for on the rear lift assist wheels on JD1790 planter.

GX5

NEW PLUMBING DESIGN PLACES
50 MESH FILTER ON INLET BEFORE
PUMP FOR EXTRA FILTRATION.

NEW STYLE

Older style required proper use of the tank to pump kit that was included in every system sold, providing extra filtration between tank and complete system inlet.

Older style also provided a 50 mesh filter plumbed before flow meter for secondary filtration.

Universal mounting bracket

PN#54898 Universal mounting bracket

PN#54586 CASE IH/JD bracket to mount the GX5 on the draw bar (Bracket can fit draw bars 8" to 10" wide)

PN#54397 GX5 Bracket for JD1720 CCS (mounted to circular plate on lift assist frame)

PN#53678 GX5 bracket for JD planter front fold for 12 & 16 row planters - will NOT fit DB models.

PN#53968 GX5 Bracket for on the rear lift assist wheels on JD1790 planter.

PN#53957 GX5 Bracket assembly for JD 1770 NT front fold 24 row planter - will NOT fit DB models.

OPTIONAL MOUNTING GX5 MOUNTING BRACKETS

INFORMATION ONLY

INLET STYLE ONLY: Manufacturer had changed the inlet style a few years ago. Please take note which style you have when ordering replacement parts.

AgXcel's NEW GX20HP is a high volume solution for treating dry fertilizer. Featuring a 3 phase motor and state of the art VFD, this unit was designed as an add-on unit for our GX20 Dry Treater. This High Pressure version has the capability of 11 GPM, thanks to our GX5 LFP45 hydraulic system with Blue Flex technology. With it's compact design and durability, the GX20HP is configured for your needs.

GX20HP LFP PRODUCT ADD-ON - PN# 56477

- Blue Flex diaphragms
- LFP45 ranges .5-11GPM
- LFP80 ranges .5-20GPM
- Variable Frequency Drive (VFD) to vary speed of single phase motor
- Can handle higher volumes, higher viscosity liquids, and higher pressure

LFP45 - Diaphragm Pump Oil

Specifically formulated for GX5 Diaphragm pumps.

- Advanced Lubrication Technology
- BlueFlex Diaphragm compatible
- SAE 30 Non-Detergent Oil

31326	LFP45 OIL QUART (CRANKCASE OIL CAPACITY 13 oz)
49538	GEAR BOX OIL QUART - 90W (GEARBOX OIL CAPACITY 15 oz)

** See pg. 39 for GXORION flow meter kits.
This kit is dependent on rates being applied.

** See pg. 71 - 75 for parts and kit options for LFP45 Hydraulic pump**

NOTE! System should be properly rinsed after use to prevent chemical hardening inside causing long term damage to system components

Proper maintenance of unit will extend the life of the system.

IMPORTANT!!
ALL GX20HP add-on units come calibrated to the rates of the customer so there is no need to open and/or alter any setting within the electrical box

The AgXcel NEW GX50 N-Fuse is your robust, chemical injection solution. Designed for injection, the GX50 N-Fuse can dispense anhydrous compatible products into pressurized nurse tanks with the utmost precision. Operating at 200 psi, the GX50 N-Fuse can deliver up to 10 gallons/min. Built to withstand the harshest weather environments, the GX50 N-Fuse is your go to injection unit.

FEATURES:

- 120v 20amp configuration
- 10 gallons/min @ 200 PSI
- High performance positive displacement pump
- 2 HP 3600 rpm self cooled motor
- Heavy Duty powder coated chassis
- Resistive touch screen
- Easy to use programming
- Industrial push button operation
- AgXcel Mag flow meter for unparalleled accuracy

High Performance Chemical Injection

- Solid design to withstand the most demanding environments
- Utilizes the AgXcel Mag Flow meter for unparalleled accuracy
- Durable Resistive touch screen

Display Features:

- Simple to use control panel
- Touch screen responsive with NH3 gloves
- Large press buttons for ease of management
- Large font
- Resistive touch screen
- IP65 Water proof display
- 1000 NIT readable in direct sunlight

Pump Features:

- 115v AC and 230v AC configurations
- Low maintenance pump that can draw even the most viscous liquids in cold weather
- Up to 10 gpm @ 200 psi
- Industrial GFI Setup
- Nylon pump head for aggressive products
- 230 psi knuckle safety relief valve
- Adjustable pressure bypass
- High pressure fittings & hoses
- High performance positive displacement pump

Motor Features:

- Single phase motor
- 2HP 3600 RPM
- TFC enclosure
- Induction Motor

The AgXcel GX50 N-fuse Gas series is specifically designed for in field applications, for safely injecting nitrification inhibitors into Anhydrous Ammonia.

The solution is able to inject into an anhydrous nurse tank located in the customers field at up to 11 GPM at 200 psi. Multiple features keep this system and the end-user safe. Give AgXcel a call for additional details and requirements.

- Full tank 1.5 hours of usage at full throttle
- Full tank 3 hours of usage at 50% throttle
- No need for electrical power
- 230 PSI safety bypass back to tank
- Adjustable relief valve
- Safe and simple to use
- Pull start engine
- 86 Octane or higher
- Universal mounting bracket
- Sotera Flow Meter

The AgXcel GX50 N-fuse Gas series is specifically designed for in field applications, for safely injecting nitrification inhibitors into Anhydrous Ammonia.

The solution is able to inject into an anhydrous nurse tank located in the customers field at up to 11 GPM at 200 psi. Multiple features keep this system and the end-user safe. Give AgXcel a call for additional details and requirements.

GX50 GAS LFP SYSTEM PN# 51862

HOSE END ANGLE VALVE

The AgXcel GX50 Transfer system is a TRUE liquid chemical transfer solution. Unlike other systems that begin to lose overall GPM when pressure increases, the AgXcel GX50T can meet high pressure demands.

The GX50T can attain 2-10 GPM even as pressure increases when transferring liquid or injecting liquid into other containers. As the liquid transfer continues and pressure from the tank increases as volume increases, the GX50T's LFP pump can meet those challenges with a rating of up to 280PSI coupled with an AgXcel specified 220v custom motor.

GX50 VISIO LITE - TRANSFER SYSTEM PN# 17955

- Agxcel LFP45 positive displacement pump with Blue Flex Technology
- Can withstand demanding weather conditions and Harsh chemicals
- Low and High PH levels
- AISI 316 Stainless Steel components
- Internal valves feature expanded openings for efficiency
- VERY LOW Maintenance
- No priming issues
- Simple to use Visio Controller
 - Simple batch setup
 - Auto rate control
 - Totalizer
 - Instant Flow Rate
 - Status Update

CHEMICAL INJECTION CAPABILITY

- Can be used to inject at up to 220PSI
- Pressure regulated to reduce/increase GPM
- Safety Pressure Bypass Valve

NOTE! System should be properly rinsed after use to prevent chemical hardening inside causing long term damage to system components

Proper maintenance of unit will extend the life of the system.

Eliminate the need for large sectional valves in the center of the implement!

The AgXcel MCV solution was designed to eliminate the need for large sectional valves in the center of the implement. This configuration requires the system to build pressure beyond the required application rate in an effort to fill all supply hose and to open up all check valves. The design of the MCV starts with the installation of the AgXcel micro valve installed on the tool bar on each row unit of the implement. For example, if the implement were a 16 row planter there would be 16 micro valves on each row unit on the tool bar. The micro valve would control both the liquid flow to its assigned row as well as control the flow rate of its assigned row.

AgXcel section control harness that connects to Y harness with 16 Pin round connector

Boom Harness

MCV's are designed to daisy chain together for a quick and simple installation process. Any configuration can be achieved for various implement configurations. This is helpful when swath control is being utilized.

MCV Body with 1/4" PTC in/out

MCV System Benefits

- Since the AgXcel micro control valve can control the flow of each row, this eliminates the need for a check valve on each row. When a standard check valve is utilized on a liquid system, reliance on a spring to open and shut the valve is required when the system is set to hold and then to run. Many times standard check valves have a tendency to stick in the open or closed position. Standard check valves also have a 3% - 7% spring tolerance so the pressure required to open a check valve on each row will vary as well. What this leads to is a varied application rate at lower pressures since each row is responding differently to system pressure and the end results are over and under application of fertilizer on each row. This tolerance is completely eliminated as the valves either open or closed and when system pressure runs below 5PSI liquid will still flow at the specified rate given that no check valve spring is required to be opened.
- Unlike with standard check valves, when the system is placed into the hold position, such as when making turns in a field, the standard check valve will allow pressure to drop down to the check valves pressure rating. So if system pressure is at 25 PSI for the specified application rate, and then the system is placed into the hold position, pressure will be allowed to escape by the check valve until it reaches the check valves pressure rating, this means that pressure could drop up to 75% of its operating pressure.
- The MCV is either in the open or closed position, and when the system is placed in the hold position pressure is maintained with a minimum of a 4% pressure drop. What this signifies is that when the system is placed back into the run position there is no longer a delay of application, liquid application is instant. This feature eliminates the ends rows of fields having the tiered look when liquid did not catch up with the speed of the implement.
- Studies were performed by AgXcel on the duration of time spent by a liquid system to prime sectional valves and all the plumbing when a system goes from a hold position to a run position. The studies performed showed that there is a 10-15 second delay from the time the system is placed in the run position to the time it takes for liquid to flow through the row applicator. This delay equated to an average of 25ft- 35ft of travel from the end of the row to the start of application.

AgX MCV Features & Benefits Include:

- Very Low voltage draw and very fast
- Complete setup for Planters, Drills, Strip-Till Application Systems
- Compatible with John Deere GS2, Ag Leader, Trimble, Raven, Micro-Trak & more
- Works for in furrow and 2x2 Solutions
- Kit comes complete with mounting bracket and harnesses
- Maintain Consistent Pressure
- Eliminate the need for check valves on every row
- Customized to YOUR needs

360 Dash

Fertilizer Application System

ROBUST * RELIABLE * SIMPLE

Introducing...

AgXcel & 360 Yield Center have partnered together to provide an optimized fertilizer pump system for the 360 DASH in-furrow fertilizer system.

Custom made specifically for 360 DASH, several components have been added to make applying starter fertilizer as simple and as trouble free as possible. These components include...

- Pressure Transducers on both the inlet and outlet of the pump.
- A Master Ball Valve to hold pressure.
- A 50PSI Pressure Regulator to ensure you never build too much pressure.
- Two Positive Displacement Diaphragm Pumps to ensure consistent application at the rows.
- A Turbine Flow Meter to accurately dispense and adjust rate as needed.
- Two filters to prevent plugging the pumps.
- AgXcel's Custom PWM to lock in on all desired rates.

The customized Dash unit built to Yield 360 center requirements and included in each kit is:

- GX2C Dual Electric or GX5 Hydraulic Unit
- Pressure Transducer kit (x2)
- 50 mesh filters (x2)
- 50 psi Pressure relief valve
- 2-way electric valve mounted and plumbed
- Turbine Flow meter
- 20ft battery harness 40 amp
- Power Extension
- Universal mounting bracket

Features:

- Both Electric & Hydraulic Diaphragm Pumps available
- Easily controlled through the 360 Yield Center Dash App
- Backed by AgXcel's Customer Support Team
