

PRECISION LIQUID FERTILIZER APPLICATION SOLUTIONS

GX7

GX7 Row by Row Monitoring

✓ Row Monitoring

Monitor the flow of every row. Know every detail about where, when, and how much fertilizer you are applying at each row.

✓ Compatibility

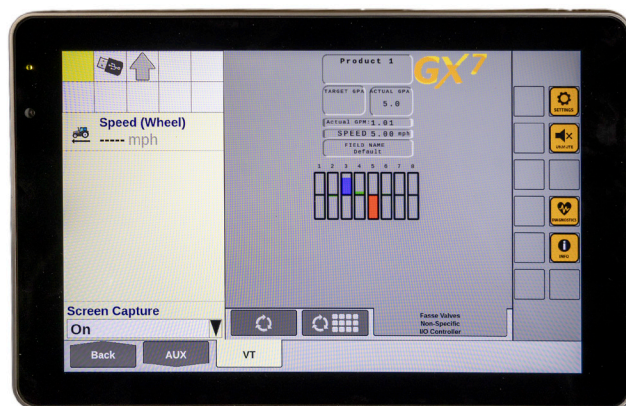

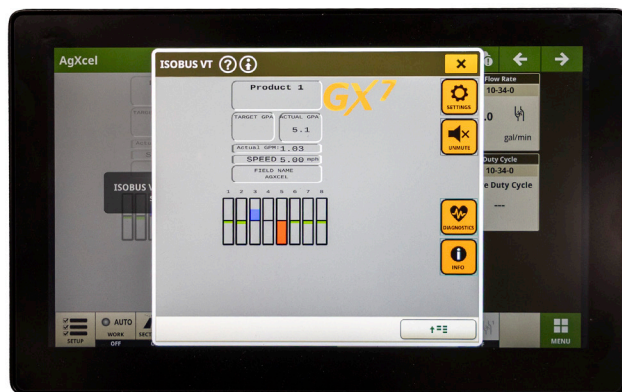

The GX7 is ISOBUS compatible & displays on the virtual terminal of your existing display.

✓ Functionality

Will work in conjunction with any liquid fertilizer pump system you have in place.

✓ Reliability

Utilizing the best equipment manufactured today.

- Utilizes Magnetic Flowmeters
- No mechanical moving parts
- Great for viscous or biological fertilizers

Features and Benefits:

- ISOBUS Compatible.
- Audible alarm warns you if a row is plugged or under preforming.
- Utilizes Magnetic Flowmeters, no moving parts means minimal maintenance and higher reliability.
- Use the GX7 Flowmeters as a manifold or use in conjunction with an existing manifold and plumbing.
- Quick response time.
